Computer Science graduate with Second Upper Honours and one year of professional software engineering experience, building practical skills across security engineering, SIEM, cloud identity security, detection engineering, security automation and incident investigation. Built a hands-on cybersecurity portfolio covering Microsoft Sentinel, Entra ID, Splunk, Wazuh, Sigma, Tines and Microsoft Defender. Seeking an entry-level Security Engineer, Security Operations Engineer or Associate Cybersecurity role.

EXPERIENCE

Sarasa Soft Solutions - Software Engineer Internship / 21 Nov 2022 - 21 Nov 2023

- Designed and developed a manufacturing management system from scratch for a major Sri Lankan fashion retailer using C#.
- Handled application development, debugging, troubleshooting and software maintenance in a professional development environment.
- Worked with the development team to analyse requirements, solve technical issues and document implementation work.

PROJECTS

Microsoft Sentinel & Entra ID Cloud Security Monitoring

- Connected Microsoft Entra ID Audit Logs to Sentinel, generated controlled identity-management activity, and investigated group-management events using KQL.
- Platforms and Technology Used: Microsoft Sentinel, Microsoft Entra ID, Log Analytics, KQL, AuditLogs

SOAR Alert Enrichment & Analyst Escalation

- Built a Tines workflow to receive a simulated SIEM alert, enrich an IP using AbuseIPDB, classify risk and route events for analyst escalation.
- Platforms and Technology Used: Tines, AbuseIPDB, REST API, Webhooks, JSON

Sigma Detection Engineering

- Created and validated a Sigma rule for encoded PowerShell activity, converted it to Splunk SPL and tested it against controlled telemetry.
- Platforms and Technology Used: Sigma CLI, Splunk, SPL, PowerShell, MITRE ATT&CK

Splunk SIEM Investigation

- Deployed Splunk Enterprise, forwarded Windows security telemetry, created SPL searches, built a failed-logon detection, scheduled alert and authentication monitoring dashboard.
- Platforms and Technology Used: Splunk Enterprise, Universal Forwarder, SPL, Ubuntu Server, Windows 11

Full SOC Incident Investigation

- Correlated authentication, PowerShell and Microsoft Defender telemetry, built an incident timeline, triaged alerts and documented escalation decisions.
- Platforms and Technology Used: Wazuh, Windows Security, Microsoft Defender, PowerShell

EDUCATION & CERTIFICATIONS

BSc (Hons) Computer Science - Second Upper Honours / Awarded June 2026

Informatics Institute of Technology (IIT), in collaboration with the University of Westminster, UK

Final Year Project: Neonatal Jaundice Detection Using Computer Vision — Python, TensorFlow/Keras, EfficientNetB4

Cisco Networking Academy - Introduction to Cybersecurity (Completed) | CompTIA Security+ (Expected Dec 2026)

ADDITIONAL SKILLS & TECHNOLOGIES

Cloud & Identity: Azure, Entra ID, Sentinel, Log Analytics, KQL, IAM | **SIEM & Detection:** Splunk, Wazuh, SPL, Sigma, MITRE ATT&CK | **Security Automation:** Tines, REST APIs, Webhooks, Python | **Endpoint & IR:** Windows Security, Defender, PowerShell telemetry, incident triage | **Network:** Wireshark, TCP/IP, DNS, HTTP/HTTPS, TLS | **Systems & Development:** Windows, Ubuntu, VMware, C#, Java, SQL
