Computer Science graduate with Second Upper Honours and one year of professional software engineering experience, building practical skills across security engineering, SIEM, cloud identity security, detection engineering, security automation and incident investigation. Built a hands-on cybersecurity portfolio covering Microsoft Sentinel, Entra ID, Splunk, Wazuh, Sigma, Tines and Microsoft Defender. Seeking an entry-level Security Engineer, Security Operations Engineer or Associate Cybersecurity role.

## EXPERIENCE

---

### **Sarasa Soft Solutions - Software Engineer Internship / 21 Nov 2022 - 21 Nov 2023**

- Designed and developed a manufacturing management system from scratch for a major Sri Lankan fashion retailer using C#.
- Handled application development, debugging, troubleshooting and software maintenance in a professional development environment.
- Worked with the development team to analyse requirements, solve technical issues and document implementation work.

## PROJECTS

---

### **Microsoft Sentinel & Entra ID Cloud Security Monitoring**

- Connected Microsoft Entra ID Audit Logs to Sentinel, generated controlled identity-management activity, and investigated group-management events using KQL.
- Platforms and Technology Used: Microsoft Sentinel, Microsoft Entra ID, Log Analytics, KQL, AuditLogs

### **SOAR Alert Enrichment & Analyst Escalation**

- Built a Tines workflow to receive a simulated SIEM alert, enrich an IP using AbuseIPDB, classify risk and route events for analyst escalation.
- Platforms and Technology Used: Tines, AbuseIPDB, REST API, Webhooks, JSON

### **Sigma Detection Engineering**

- Created and validated a Sigma rule for encoded PowerShell activity, converted it to Splunk SPL and tested it against controlled telemetry.
- Platforms and Technology Used: Sigma CLI, Splunk, SPL, PowerShell, MITRE ATT&CK

### **Splunk SIEM Investigation**

- Deployed Splunk Enterprise, forwarded Windows security telemetry, created SPL searches, built a failed-logon detection, configured a scheduled alert and developed an authentication monitoring dashboard.
- Platforms and Technology Used: Splunk Enterprise, Universal Forwarder, SPL, Ubuntu Server, Windows 11

### **Full SOC Incident Investigation**

- Correlated authentication, PowerShell and Microsoft Defender telemetry, built an incident timeline, triaged alerts and documented escalation decisions.
- Platforms and Technology Used: Wazuh, Windows Security, Microsoft Defender, PowerShell

### **Threat Intelligence API Automation**

- Built a lightweight tool to validate public IP addresses, enrich indicators using AbuseIPDB and export structured threat intelligence results.
- Platforms and Technology Used: AbuseIPDB, REST API, JSON, CSV, Python

### **Advanced Phishing Investigation**

- Analyzed a simulated phishing email, identified suspicious sender and reply-to indicators, reviewed authentication results and documented escalation findings.
- Platforms and Technology Used: Email Header Analysis, SPF, DKIM, DMARC, MITRE ATT&CK

### **Malware Sandbox Analysis**

- Analyzed a public malware sandbox report, reviewed persistence and network behavior, identified suspicious indicators and documented investigation findings.
- Platforms and Technology Used: ANY.RUN, Malware Analysis, IOC Analysis, MITRE ATT&CK

## EDUCATION & CERTIFICATIONS

---

### BSc (Hons) Computer Science - Second Upper Honours / *Awarded June 2026*

Informatics Institute of Technology (IIT), in collaboration with the University of Westminster, UK

#### Final Year Project — Neonatal Jaundice Detection Using Computer Vision

- Developed a computer vision system for neonatal jaundice detection using newborn image data. Implemented image preprocessing, illumination correction, ROI extraction, data augmentation and model training using EfficientNetB4.
- Evaluated the model using cross-validation, ROC-AUC and classification metrics and developed a web-based prototype.
- Technologies: Python, TensorFlow, Keras, EfficientNetB4, Computer Vision

Cisco Networking Academy - Introduction to Cybersecurity (Completed) | CompTIA Security+ (Expected Dec 2026)

## ADDITIONAL SKILLS & TECHNOLOGIES

---

### Cloud & Identity Security

Microsoft Azure, Microsoft Entra ID, Microsoft Sentinel, Log Analytics, KQL, IAM fundamentals, Audit Log analysis

### SIEM & Detection Engineering

Splunk, Wazuh, Microsoft Sentinel, SPL, Sigma, MITRE ATT&CK, detection rules, alerting, dashboard creation

### Security Automation & Threat Intelligence

Tines, REST APIs, Webhooks, AbuseIPDB, JSON, CSV, Python basics, workflow automation

### Endpoint & Incident Investigation

Windows Security logs, Microsoft Defender, PowerShell telemetry, authentication analysis, alert triage, incident timelines

### Network Security & Traffic Analysis

Wireshark, TCP/IP, DNS, DHCP, HTTP/HTTPS, TLS, TCP handshake, basic network traffic analysis

### Systems & Virtualization

Windows, Ubuntu Linux, VMware Workstation, Linux command-line fundamentals, SSH

### Software Development

C#, Java, SQL, application debugging, troubleshooting, requirements analysis
